

# Alimentatore Led

#### ALI WP 24V MW 75W 3,15A DA-ELG IP67

Cod. 112212

Alimentatore adatto ad installazioni in esterno. Corpo in alluminio Classi di protezione I, MM 110. Tensione e corrente regolabili mediante potenziometro

## Caratteristiche tecniche

### Caratteristiche geometriche

# 48~75W Constant Voltage + Constant Current LED Driver **ELG-75** series

NOTE	1. All parameters NOT specially mentioned are measured at 230VAC input, rated current and 25°C of ambient temperature.  2. Please refer to "DRIVING METHODS OF LED MODULE".  3. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.  4. Tolerance: includes set up tolerance, line regulation and load regulation.  5. De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details.  6. Length of set up time is measured at first cold start. Turning ON/OFF the driver may lead to increase of the set up time.  7. The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.  8. This series meets the typical life expectancy of >50,000 hours of operation when Tcase, particularly (to point (or TMP, per DLC), is about 70°C or less.  9. Please refer to the warranty statement on MEAN WELL's website at <a href="http://www.meanwell.com">http://www.meanwell.com</a> 10.The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft)
